Description

This truly exceptional property is one of Atherton's Finest Estates with an unparalleled combination of grandeur, luxury, and timeless appeal. Set on an expansive 3.17-acre level lot, the estate is enveloped by breathtaking gardens established with specimen plantings at every turn adding a unique and awe-inspiring dimension. The entire property was artfully rebuilt within the main structure in 2001 into a remarkable living experience with discerning taste. Over \$22 million, in today's currency, was spent to completely rebuild and upgrade the home. The kitchen/family room was recently remodeled in 2020. Portions of the interior was recently repainted and new light fixtures and hardware were installed. Great consideration was given to creating multiple strong axes that connect not only one room to another but also to the grounds and through the center courtyard that connects the rooms on all four sides. The seamless blend of sophistication and warmth throughout ensures that moments spent here are cherished, whether hosting lavish gatherings or enjoying intimate daily activities with friends and family. An unparalleled lifestyle for the best of timeless elegance and luxury living in the country's most highly ranked city.
