Description

In collaboration with our Spanish partners, we have the pleasure to bring you the opportunity to buy a spectacular new build independent villas located in Valle del Este Golf in Vera, an ideal place to live, especially if you enjoy an active, outdoor lifestyle. The area offers a quiet environment, surrounded by nature, ideal for walking and enjoying the sun. The Jacaranda urbanization is one of the newest and most attractive in Valle del Este Golf. It is a private complex that offers a safe and quiet environment, perfect for those looking for a place to live or vacation. The homes have free spaces that allow great flexibility in the design and use of the land, with parking for cars, which adds comfort and facilitates access. Owners can choose to include a private pool or large spa, creating an ideal environment to relax and enjoy. Without a doubt, Jacaranda offers the possibility of creating a personal refuge. The team of architects is available to create a design to your liking, allowing future owners to adapt the home to their needs, with up to 6 bedrooms, gym, guest area, etc. This is especially useful on type X plots, which have specific geometries and require an adapted design, but the same flexibility is also offered on any other plot. AVAILABLE PLOTS- TYPE C AND D HOMES (15,000€ EXTRA FOR COMPLETED KITCHEN) Plot 9 - Type C with pool 398,000€ Plot 10 - Type D with pool 398,000€ Plot 11 - Type C with pool 398,000€ Plot 12 - Type D with pool 398,000€ Type C and D Homes In the Jacaranda urbanization, individual ground floor houses TYPE C and D, option of up to 4 bedrooms. FOUNDATION AND STRUCTURE According to the geotechnical study carried out, a reinforced concrete slab foundation system, suitable for correct structural behavior. The structure will be made using a reinforced concrete structure executed according to current regulations, with 30 / 35cm thickness unidirectional floors with joists in situ. Concrete and steel control tests will be carried out for the QA. Likewise, a Control Body will be designated Technician (OCT) to carry out the control. DECK and TERRACES The roof will be flat, not passable, inverted type finished in gravel, composed of waterproofing, geotextiles, isolation thermal extruded polystyrene of thickness 80 mm and finished in gravel. The formation of chimneys will be with prefabricated pieces. The terraces will be finished in porcelain stoneware. WALLS The vertical enclosure of the housing envelope will be executed by means of a double ceramic brick facing, with an intermediate layer of rock wool 60 mm thick for thermal and acoustic insulation. In dividing walls, located in the exterior divisions between plots, a white split-type concrete block will be used. The interior divisions of the house are made with a 7 cm thick partition of double hollow ceramic brick. EXTERIOR FACADE In the avant-garde design of the development as a whole, different finishes and volumes will be combined. Coating with continuous white mineral mortar plaster on facades, flight ceilings and breastplates. In addition, depending on the design, areas will be cladding with natural stone pieces. The termination cores of the roof plinths, as well as the window sills, will be made of natural stone of e: 2 cm. The terrace railings will be made of 8 + 8 mm thick glass INTERIOR CARPENTRY. DOORS Entrance door to the house in anthracite gray color, with an opening leaf, consisting of a frame, a peephole and security locks with 3 anchor points. Interior doors of passage, will be 2.10 m high, in white lacquered finish EXTERIOR CARPENTRY AND GLASS Exterior carpentry made of ALUMINIUM RPT, anthracite gray RAL 7016. STRUGAL series INFINITY 140, serie INFINITY 140 and S82 hidden window depending on the gap, tilt-and-turn or sliding (thermal bridge break). Thermal aluminum slat blinds at bedrooms. Glazing with solar control, in a composition of 3 + 3/12/3 + 3 mm thicknesses for large elements and 4-16- 4 mm for smaller elements. Not including interior blinds or curtains, or slats or lattices. INSTALLATION OF PLUMBING AND PRE-CLIMA Plumbing network with multilayer pipes, and sanitation network with PVC pipes. Shower trays flush with the floor, made of synthetic resin, white color.
