Description

A great investment property with fabulous sea views, a short drive from Arillas beach. Located on the hill leading down to the resort of Arillas, this interesting property has lots of potential. Currently there are three separate apartments spread over two levels - two of the apartments are on the ground floor each with one bedroom, one bathroom and a kitchen. The top floor is a spacious two bedroom apartment with a bathroom and kitchen/dining area. The large balcony at the front has lovely sea views. With some imagination the property could be converted into a one large home, or even two large apartments, one on each level. The house comes with a large garden measuring 3600m², mainly to the side of the property and with plenty of space for a swimming pool. Perhaps the biggest advantage is the additional build allowance of 270m² on the land. The views from every corner of the house are fabulous combining green hills, the Adriatic sea with Gravia island directly in front, and the famous west coast sunsets. The beach of Arillas is just a 4 minute drive away and the city of Corfu town 36km away.
