Description

Extraordinary property on the BushmansriverRiver Roost is set in a two hectare award winning garden. It has a road leading down to the jetty on the river. The house was designed by a leading architect in the area, Francios Theron. It was designed to flow easily with lots of open space but also areas to be quiet. Every room looks out onto the garden. Spaces were created to allow one to be out of the wind irrespective of its direction.. There are four en-suite bedrooms in the main house, and two further self-catering units in the garden and a two bedroomed 180 m2 cottage overlooking the river. The property also has a large vegetable garden and a tunnel and cold room. For the more energetic there is a gym. The property has solar panels, inverter and 10 kw batteries. There are storage tanks for about two hundred and forty thousand litres. Although just three kilometres from Kenton one has the feeling ones in the bush.
