Description

This fabulous, newly completed condo (interior 2024) with smart floorplan, outside of the resort homeowners association has everything you've been dreaming of for your mountain getaway. Boasting two bedrooms, two bathrooms plus a multi purpose small loft, this cozy condo really packs a punch with the amenities. Gorgeous modern and rock gas fireplace in main living area centers the room, imagine watching the snow fall, drinking a hot chocolate and watching a movie. Small, convenient kitchen has everything you need including a washer/dryer stackable all in one unit. First of the two bedrooms acts as the primary bedroom with a kitchenette including a sink, microwave, mini fridge and shelving units. This portion of the condo doubles as a "lock off" so you have options for renting out the entire unit or locking this off and renting either portion. The second bedroom has a queen bed and guest bathroom. Heading to the loft upstairs via stair ladder you can find an additional two single beds and a little gaming nook - perfect for the kids. Located on the second (top) floor and complex has an elevator for easy access all year round, vaulted ceilings give a large open feeling. Wonderful exterior deck is larger than most units this size with great views of the Sangre de Cristo Mountain range including Wheeler Peak. Two mini split systems provide heat and a/c in the primary lock off and the main living area - an absolute treat to have a/c in Angel Fire! Great financing options available as it is one of the few condos that has only one HOA in Angel Fire!
