Description

Custom-built in Colorado style, this spacious two-story home combines thoughtful updates with quality construction. The light-filled great room with a wall of windows overlooking the golf course and chef inspired kitchen with cherry cabinetry, new Quartz counters and newer appliances together create a warm and functional heart of the home. Newly refinished hardwood floors extend through the entry into the formal dining room and office/music room. Upstairs, the primary bedroom adjoins an updated bathroom. Two additional generously sized bedrooms, full bathroom and the laundry room comprise this level. A bonus level reveals two more charming bedrooms and full bathroom, a perfect retreat for those who prefer a more separate space. The full basement features a large living area, a handicapped accessible bathroom and bedroom and a stair chairlift that directly accesses the oversized garage. A "secret room" offers storage and security options. Other recent upgrades include new interior paint, new carpet, new roof, newer furnaces and ACs and newer exterior paint. Situated at the end of a cul de sac siding to the golf course, this home is in the Boulder Valley school system. Located in the Broomfield district with the lowest property tax rate and within a voluntary HOA, this property offers abundant square footage at an affordable price.
