Description

Four bedrooms, all ensuite plus a powder room. 10' & 12' ceilings throughout. It features an ideal bedroom layout: the primary suite is on one side of the home, providing great separation from the three additional guest bedrooms on the other side, each with its own ensuite bathroom. A powder room is available for guests. All in nearly 3,000 square feet, many exterior updates, interior in A+ condition also with various updates, definitively in move-in condition. Views? YES, great southern mountain views from many positions both inside and out, starting with the charming courtyard at the entry, to the back where property sits higher than those on the pool side so there are expansive vistas and real privacy with Mt. San Jacinto as a backdrop. Sits at the top of a cul-de-sac in one of the few enclaves inside IWCC that has real live children and people under 60 (no offense to my compadres with whom I share this demographic). The yard space is great for kids and dogs and even those a bit older will find it relaxing, perfect for entertaining and most importantly, naps. Landscaping is especially low maintenance, all grass is turf, bushes and trees require infrequent trimming. Come see it, you will be glad that you did, time well spent.
