Description

Absolutely the best that Minneapolis has to offer. Proudly presenting The Charles Frederick Keyes House, recognized in 2017 for "meticulous and thoughtful attention to detail while maintaining the architectural integrity of this designated historic home." Inspired architecture, an exquisite setting and a remarkable residence that is structurally and mechanically perfect. You can have it all! This historic Lake of the Isles residence is simply enchanting. The location provides unsurpassed views of the lake that celebrate sunsets from the western exposure. To the south, the home enjoys walls of glass presenting inspired gardens infused with sunlight, that blend seamlessly into the home. The original home was renovated and enhanced by the acclaimed Rehkamp Larson Architects, creating a home that transcends brick and mortar and achieves a presence that is both art-form and elegant function. The spaces invite entertaining while also offering intimate and comfortable rooms to gather and enjoy the storybook setting that surrounds the home. Every level, and surface, has been updated thoughtfully with carefully selected materials, design and detailing. The primary suite is a virtual sanctuary with soaring windows providing morning light. The suite is complimented with a spa like marble bathroom. The second floor has two additional bedrooms and bathrooms, one ensuite. The third floor provides a sanctuary/studio/home office. The lower level is perfection as both a comfortable living space while showcasing pristine mechanicals including geo-thermal heating/cooling. This home is better than new! Virtually every surface and element has been restored & reimagined, resulting in the rare combination of a classic Isles residence, comprehensively updated mechanically and structurally. Every detail will delight..including a translucent basswood stairwell. This is the very best Minneapolis has to offer, and it can be yours. Come see!!!
