Description

Completely renovated from top to bottom, this classic 1950s bungalow has been reimagined with a modern twist while preserving its original character. Every major system and surface has been thoughtfully updated, creating a home that feels fresh, polished, and move-in ready. Offering 3 bedrooms, 2.5 bathrooms, and 1,617 square feet of heated living space, the layout balances charm with functionality. Luxury vinyl plank flooring runs throughout the home, tying each space together with a clean, cohesive look. The living room centers around an electric fireplace, adding warmth and visual interest without the upkeep. The redesigned kitchen features Shaker-style cabinetry, stainless steel appliances, and leathered granite countertops that add texture and durability while keeping the space refined. All faucets and fixtures throughout the home are brand new, and new windows improve both efficiency and natural light. Outside, the updated board and batten front exterior gives the home strong curb appeal, blending classic bungalow proportions with crisp, contemporary detailing. Off-street parking adds everyday convenience. The location places you close to downtown Wilmington, area beaches, and a wide range of shopping and dining options. Beaumont Park is also within walking distance. This 4.1-acre neighborhood park includes a playground, picnic shelters, and basketball courts, offering easy access to outdoor space right nearby. This renovation brings together timeless style, modern finishes, and a location that supports an active Wilmington lifestyle.
