Description

Incredible opportunity to own a magnificent expanded, sprawling ranch set on a perfect flat oversized .49-acre lot with the kind of privacy, parking, and lifestyle space buyers dream about—featuring 4 bedrooms and 4 full baths. This home sits beautifully set back off the street with a one year young roof and long private cement driveway leading to an oversized detached two and a half car automatic garage with electric, double doors, and the real showstopper is the massive cement “mouth” outside the garage that opens up wide for an easy turnaround, backing in, and parking all your big toys with ease—boats, RVs, campers, trailers, and oversized vehicles have all the room they need. From the moment you arrive, the curb appeal hits hard with a beautiful front porch, crisp vinyl siding, and stunning cedar impression front siding feeling clean, modern, and exciting. Out back, the entertaining is next level with an enormous covered and uncovered deck featuring two ceiling fans and not one, not two, but three entry points into the home—perfect for seamless indoor-outdoor living. Inside, the open floor plan is full of upgrades including luxury vinyl flooring and custom made blinds throughout, a formal living room with breathtaking vaulted ceilings, recessed lighting, skylight, ceiling fan, and dramatic floor-to-ceiling windows that pour in natural light. The living room flows right into the eat in kitchen with slider access to the yard. Kitchen features maple cabinetry, black and stainless steel appliances, gas for cooking, a gas range, abundant counter and cabinet space, recessed lighting, a skylight, and a breakfast bar for everyday convenience. The kitchen leads into a step-down den/family room with another vaulted ceiling, recessed lighting, and a custom stone fireplace that anchors the space with warmth and character. This expanded wing also offers a private office or secondary primary suite with its own full bath and separate entrance as well as a washer and dryer —ideal for guests, extended family, or a work-from-home setup. The main portion of the home features three spacious bedrooms including a primary suite with vaulted ceilings, ceiling fan, sliders that lead out to the deck and its own private bath with a white vanity and stand-up tiled shower, plus a spa-like hallway bath with a white tub and classic white subway tile. The finished basement adds even more living space with tile flooring, recessed lighting, and an additional full bath with tub and shower, and to top it all off, this home also features central AC for year-round comfort. 200 amp electrical panel with generator hookup for total peace of mind and In-ground irrigation
