## Description

You will love this precious 1954 home that's been updated, but has not lost its charm. With original wood floors that are gorgeous, the extra large living area is really special. The tongue and groove walls and wood ceilings add to the charm. This 3 bedroom home features one bedroom that is actually a studio with a bath included in it. This area could be used for extended use, especially with the entrance from the back door. This area could be private from the rest of the house. The outside shop, two car garage, two car carport, all bring extra value to this property. With a new roof put on in 2023, a new hot water heater, and all the plumbing under the home replaced recently, this is a great home. It is built very sturdy with a great foundation and thick, solid walls. The home has a special outdoor electrical hookup for your generator to run the entire house. Schedule your showing today!
