Description

This former Eddy Homes model in Spring Way blends luxury living with the kind of warmth that instantly feels like home. Located in the North Allegheny School District, it was thoughtfully designed to be both beautiful and truly livable. A covered front porch welcomes you into a light-filled interior where every space feels intentional. The private office, complete with custom built-ins and rich, color-drenched walls, creates an elevated yet comfortable work-from-home setting. The open floorplan showcases high-end finishes and thoughtful details throughout. At the center of it all, the kitchen sets the tone with designer selections, generous prep space, and effortless flow into the main living areas, perfect for gathering with friends or enjoying quiet evenings at home. Upstairs, the owner's suite offers a peaceful retreat with calming finishes and a spa-inspired bath. 3 additional bedrooms, 1 with jack-n-jill bath and other with ensuite. Convenient 2nd floor laundry. The third floor provides added flexibility with an additional bedroom and bonus space that easily adapts to your lifestyle, whether for guests, work, or play. The finished walkout lower level extends the living space with a spacious recreation area, exercise room, and full bath, giving everyone room to spread out and enjoy. Mudroom with built-ins and an oversized walk-in pantry off kitchen to help make life more organized. Out back, the setting is truly special. Backing to the community trail and pond, you'll enjoy serene views and the simple pleasure of watching kids fish just steps from your backyard. It's peaceful, private, and beautifully connected to nature. As the original model home, every finish and upgrade was carefully selected to showcase the very best of Spring Way. This is more than a stunning home, it's a place where luxury and everyday living come together effortlessly.
