## Description

5 Bedroom Family Home in Fourways Gardens  
5 Bedroom architectural masterpiece, designed by the renowned Nico van der Meulen in phase 2 of Fourways Gardens. This beautiful family home sits proudly on an expansive double stand within one of the area's most esteemed residential complexes. A true synergy of glass, steel, and light, the residence epitomises modern luxury while maintaining a seamless connection to the outdoors.

**Architectural Splendour & Living Spaces**  
The home is defined by its vast, open-plan dining and living areas. Designed to invite an abundance of natural sunlight, these spaces feature high ceilings and floor-to-ceiling glass stack doors that blur the line between the interior and the manicured grounds. Whether hosting a formal gala or a quiet family dinner, the flow of the home ensures an atmosphere of effortless elegance.

**Master Chef's Vision:** Catering to both large-scale entertaining and private family life, the property boasts two fully functional kitchens. The primary kitchen serves as a sleek social hub with high-end integrated appliances, while the secondary kitchen allows for discreet meal preparation, ensuring the main living areas remain pristine.

**Private Sanctuaries:** The residence offers five voluminous bedrooms, each designed as a private retreat. The master suite, in particular, serves as a masterclass in luxury, offering generous proportions and exquisite finishes.

Complementing the main house are dedicated domestic quarters and a sophisticated four-car garage facility.

**A Sculptural Spa Experience:** The use of Italian stone within the sauna not only ensures a sophisticated, minimalist aesthetic but also provides a deep, radiating heat that is both indulgent and restorative. This seamless transition from the main bathroom surfaces into the sauna itself creates a unified wet-room feel, where natural textures and high-end design transform the space into a world-class private spa.

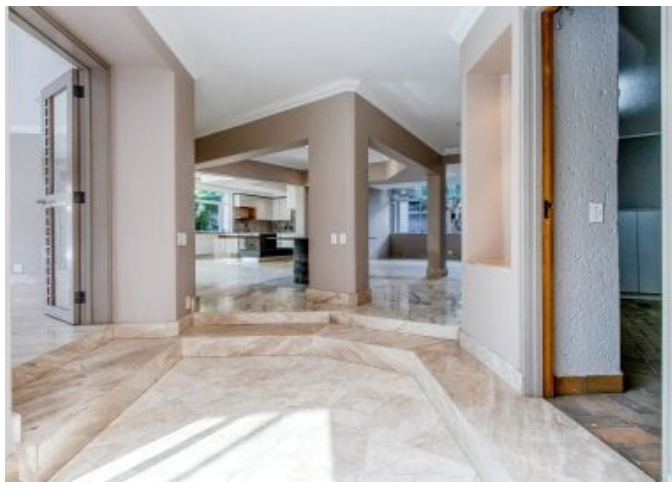

**Art, Water, and Nature:** The exterior is a testament to fine living, featuring a sparkling swimming pool set within a sprawling garden. The crowning jewel of the estate is an original sculpture by Juan Soriano, which adds a gallery-like prestige to the outdoor space, creating a visual dialogue between world-class art and van der Meulen's iconic architecture.

The landscape of this estate is as much a part of the architecture as the concrete and glass. The gardens are a lush, sanctuary of indigenous flora and manicured lawns, designed to soften the home's bold lines and create an "oasis" of contemporary luxury. Open rooms and ample windows ensure that this verdant design scape is visible from nearly every room, merging the indoors with the surrounding nature. The area is renowned for its vibrant birdlife, and the presence of owls—particularly the Spotted Eagle-Owl and the Barn Owl—is a hallmark of the complex's serene atmosphere. It is not uncommon to hear their haunting calls at dusk or to glimpse their silent silhouettes perched among the trees.
