Description

Enjoy the best of country living in this cozy 3-bedroom home. Closet being added to upper loft bedroom. A bright, oversized sunroom (potential bedroom) and a versatile loft space. The open layout makes the home feel spacious and welcoming. It needs a bit of TLC, but much of the prep work like removing old carpet has already been done. A heat pump and central HVAC keep the home comfortable year-round. The loft isn't included in the square footage but could be a bedroom. Sitting on 1.14 acres with a large, detached garage, this property offers room to spread out while still being just minutes from shopping, dining, and highway access. Selling AS IS!
