Description

Have it all in this exceptionally maintained Murray Franklyn northwest contemporary resale. Located in the heart of the East Side's tech hub, this single-owner home has been maintained to a standard that is rare in the market today. The ideal corner lot location and professionally maintained landscaping makes a fabulous first impression. Enter the home through custom wood doors and the experience begins. Start in the kitchen where the 2009 remodel added a fabulous great room creating a space that is both comfortable and functional. Custom built-ins flank the massive granite-capped counter, complete with ample storage space. The high-end appliance package is a chef's delight; this space is just perfection. For more formal occasions, move seamlessly into the adjacent Formal Dining Room. The Formal Living Room, with its beautifully pitched ceiling and oversized windows, is elegance defined. Still upstairs find 4 bedrooms with a primary suite that has ideal size and an attached bath. Like the upstairs, wait until you see what's downstairs! The sweet family room has a perimeter of custom cabinetry and is centered around a beautiful gas fireplace. Neighboring this room is a fabulous home office/5th bedroom. Move past the oversized laundry room and adjoining bathroom to the + sized garage that can accommodate 2 cars with storage. Newer roof/gutters, newer vinyl windows, newer furnace with A/C, Lake Washington Schools, and just seconds away from Microsoft and East Side tech.
