Description

Room to Grow, Space to Breathe, and a Price That Lets You Live Your Life. If you've been looking for a home where your family actually fits- where everyone has their own space without stretching your budget-this is it. From the moment you walk in, you feel it... real space, real comfort, and a layout that works with your life instead of against it. The main level welcomes you with a warm, inviting living room anchored by a wood-burning fireplace, the kind of place where winter nights feel better, holidays feel fuller, and everyday moments feel a little more special. Just off the main living area, you'll love the fabulous 4-season porch overlooking the backyard, giving you a bright, peaceful place to relax year-round while keeping an eye on the kids or simply enjoying your own quiet time. The kitchen is ready to go with newer stainless-steel appliances, so you're not starting with a to-do list, you're starting with a home you can use right away. On the main level, you also have two additional flexible rooms that can become whatever your family needs most-a home office, music room, playroom, or even a quiet retreat space. This is the kind of layout that adapts as your life changes. Upstairs, you'll find 4 spacious bedrooms all on one level, which is exactly what families are looking for. The primary suite is a true retreat with a fantastic bathroom featuring double sinks, a large soaking tub, and a separate shower-giving you space to unwind at the end of the day. And then there's something truly unique... a private bonus room located above the garage, accessed through the primary suite walk-in closet. This is your hidden space-perfect for a craft room, reading nook, private office, or a quiet parent getaway that feels tucked away from the rest of the home. Downstairs is where this home really separates itself from everything else in this price range. This isn't just a basement, it's a full second living space designed for real life. You get a gigantic family room that can handle movie nights, game days, gatherings, and everyday living without ever feeling crowded. A two-sided gas fireplace connects this space to a wet bar area, creating the perfect setup for entertaining or simply enjoying your space in a more relaxed way. Whether it's hosting friends, giving teenagers their own hangout, or creating the ultimate family zone, this level gives you options that most homes simply don't have. The laundry room is another quiet win-plenty of space, including room for a folding table, making everyday chores easier and more organized. Step outside and it only gets better. The backyard is fully fenced for safety and peace of mind, giving kids and pets a secure place to play freely. And beyond the fence, you have your own wooded backdrop-a natural extension of your yard that feels like your family's private adventure space. Think about less screen time, more exploring, more fresh air, and more memories being made right at home. Here's the best part, you don't have to do everything at once. The home is clean, empty, and move-in ready. You can settle in, enjoy the space, and update cosmetic items over time as it fits your budget and your vision. No pressure, not overwhelming, just opportunity. In today's market, it's rare to find a home that offers this much usable space, this kind of flexible layout, a safe and private yard, and a price point that still makes sense. This isn't just a house, it's a place where your family can spread out, grow into, and truly feel at home. Come see it in person and you'll understand right away why this one is different. This is the largest home, at the best price available in Burnsville!
