Description

Situated on a spacious corner half-acre lot in an established neighborhood with no HOA, this charming limewashed brick bungalow offers flexibility, character, and exceptional garage/storage space in a highly convenient Greenville location. With just under 1,000 square feet, the home features original hardwood floors, a large eat-in kitchen, and an updated bathroom with a walk-in shower. Outside, you'll find an inviting front porch for morning coffee and a back deck and fire pit area for more entertaining space. There is a huge detached two-car garage, an additional storage shed, and two separate gravel driveways offering excellent parking, workspace, or future expansion possibilities. The layout and lot configuration may also make this property appealing as a potential investment opportunity for long-term or short-term rental use, (buyers responsible for verifying any short-term rental regulations or restrictions). Enjoy a quiet setting while still being just minutes from Paris Mountain State Park, downtown Greenville, and Travelers Rest. Right outside your door, you'll find a great variety of restaurants, shopping, the ever popular Swamp Rabbit Trail, and many other outdoor recreation opportunities.
