## Description

Designed with architectural discipline and structural precision, this Refined-built residence captures natural light and water views across Lake Harvey. Oversized windows, clean lines, hickory floors, and a linear fireplace define the open main level, anchored by a floating staircase with cable railing. The kitchen features large island, honed granite and custom cabinetry designed for both function and visual simplicity. A dramatic floor-to-ceiling sliding wall system allows the adjacent family room to open or close effortlessly - far beyond decorative doors. Oversized sliding glass doors open to an elevated deck with linear gas fire feature. Five bedrooms are located on the second level, each with a private ensuite bath with heated floor, plus a loft with water views. The walkout lower level offers heated floors, family room, wet bar, wine cellar, exercise room, jacuzzi room, and two additional bedrooms. Heated 4 car garage connects to mudroom and butler's pantry. A home defined by proportion, precision, and thoughtful design.
