Description

Stunning 2 story home with 2 living spaces, a media room, dedicated office, and a 3-Car Garage! Welcome to a home that delivers on space, style, and thoughtful design from the moment you arrive. Striking curb appeal and a rare three-car garage set the tone before you even step inside. Just off the entryway, a dedicated home office offers the perfect spot for working from home or a quiet study. Vinyl plank flooring runs throughout the main level, leading into an open-concept living area anchored by beautiful custom built-ins and a cozy electric fireplace. The bright, spacious dining area flows seamlessly into a gorgeous kitchen featuring under-cabinet lighting and a center island with optional seating. A pantry, plus a larger additional storage closet nearby provide plenty of space for all your kitchen items. The main-level primary suite is a true retreat, complete with an en-suite bath with dual sinks, a spacious garden tub, a separate shower, and a generous walk-in closet. A convenient guest half bath and utility room round out the first floor. Upstairs, you'll find versatile additional living space, including a cozy nook ideal for reading or a secondary workspace, a large media room perfect for movie nights, three well-sized bedrooms, and a full bath. Step outside to a spacious backyard built for both relaxing and living. A covered back porch invites you to unwind, while full privacy fencing and a separate fenced area for pets or a garden make outdoor living easy and worry-free. The third garage bay offers flexible space for an extra vehicle, hobbies, or a workspace. Additional highlights include a front and rear lawn sprinkler system, rain gutters throughout, and a 240 V plug in the garage for electric vehicle charging. Located just a short walk away from the community park and mailboxes!
