Description

I hear clients say "I want something that will not flood". Well, this one was built to stand anything mother nature can throw at it. Included in the sale is a shop with three bays, a barn with floored deck upstairs, additional storage building, and a game room all on 4.88 crossed fenced acres. This wonderful home is waiting for its new owners. Seller built this one to last. The property line is about 20ft outside of the fence all the way around. Gorgeous trees in the yard. The house boast 3 eating areas great for entertaining. And has a nice covered patio where you can enjoy the pretty view that includes a waterfall. This home was built with love. In addition to all this there is a extra driveway that is solid all the way to the back of the property. Bring the livestock or/and all your hobbies! Plenty of storage area and room to work and grow. If you need more how about a well for watering the garden and a sprinkler system built in. Still more to list but I'm running out of room.
