Description

Take in sweeping mountain vistas from this updated Mid-Century Modern, perched on a hillside street in Monterey Park. Original charm is beautifully intact, with a stone-clad fireplace, earthy details, and tasteful built-ins throughout; playful designer wallpaper and vintage-inspired fixtures are carefully curated to let the 1960s roots shine. Classic shutters add character in the light-filled living space, where expansive glass sliders blur the line between indoors and out, opening to the patio. In the dining room, mountain views create a breathtaking backdrop for every meal. The kitchen delights with sunny butter-yellow cabinetry and provides stainless appliances. Two bedrooms include a generous primary suite with glass sliders to the yard. The outdoor spaces are designed for relaxation and entertaining, with a deck for morning coffee and evening cocktails, and a hot tub for stargazing and winding down. A two-car garage holds potential as a workshop or future ADU; conveniences include central AC and updated systems. You are moments from Garvey Ranch Park and Observatory, and scenic hiking trails, within Monterey Park's excellent school system, and close to the renowned dining of the San Gabriel Valley, with easy access to major freeways.
