Description

Two-story with 4 bedrooms on 1 level! Move-in ready with lots of space and a fenced-in yard. A sweet front porch with beautiful arched brickwork welcomes you into the spacious entry. Upon entering, note the wood floors that grace the large living room and connect to the formal dining room. Tile floors lead you from the entry through to the kitchen for durability and practicality. There's plenty of storage space in to-the-ceiling maple cabinetry, with face front accents, nickel hardware, and a tile-glass backsplash for that special touch. A built-in wine rack and stainless steel appliances (including double oven) are sleek and functional, while recessed lighting brightens your work area. From the eat-in kitchen, step out onto the screen porch with tongue and groove ceiling and fan, then be led out onto the patio for additional outdoor living space. The family room adjacent to the kitchen, also spacious, has a wood-burning fireplace with floor to ceiling brick. Upstairs you'll find 3 bedrooms and a main bath with a tile floor, plus a primary suite with 2 closets (one a walk-in) and an ensuite bath - rare to find in a home built in this era. More space in the lower level allows for recreation or a second family room, plus great storage in closets and a dedicated storage room, in addition to ample laundry space. There are so many updates throughout - from the stylish kitchen, to lighting and bath upgrades, to windows and doors, to design details. The exterior setup provides for bonus functionality, with the concrete driveway, additional parking pad on the side, a shed, gardens, and fully fenced yard. Located on a cul-de-sac street, this home has so much to offer! Furnace and AC: 2023. Appliances: 2021. Roof: 2017.
