Description

St. AnnEscape to the cool hills of St. Ann's academic capital. Nestled on the outskirts of Browns Town, this property offers sweeping views of both sea and mountains. Sit on the front verandah and watch cruise ships glide by, or settle in for some of the most brilliant sunsets you'll ever see. The property is largely self-sufficient, with rainwater harvesting and generous acreage that gives it the feel of a private farmstead. A chicken and goat pen provides a potential income stream, while the gently sloping land and hillside offer further opportunities. The home itself offers comfortable living, with just a little TLC needed to make it perfect—depending on your tastes and preferences. The primary bedroom opens onto the front balcony, while the other two bedrooms and the living room access the back balcony. Downstairs, a bedroom with an ensuite bathroom also features its own balcony. A storage room, TV/utility room, study, and sewing room complete the lower level, all accessible from the double carport.
