(\$67,500,000)

Description

A once-in-a-generation opportunity to claim 207 feet of direct oceanfront in Golden Beach, Florida's most coveted coastal enclave. This trophy assemblage of two oceanfront parcels totals over 60,000 square feet of irreplaceable land, offering the rarest of canvases at the edge of the Atlantic. Architectural plans by the legendary Bjarke Ingels envision an iconic masterpiece, with 12beds and 24,000+ SF of living space, centered around a soaring three-story open-air courtyard, a home where every space flows toward sweeping ocean views and a lush tropical landscape. Designed for a life of gathering, celebration, and generational legacy, this is where visionary architecture meets the shores of South Florida. An unrivaled site. An extraordinary future.
